IN THE CLAIMS

Please cancel claims 1-29 and 41 without prejudice or disclaimer.

Please amend claim 39 as follow:

39. (Currently Amended) A system for routing data across heterogeneous networks comprising:

- a first network having a first protocol;
- a second network having a second protocol, wherein the second protocol is incompatible with the first protocol;
- a first device connected to the first network;
- a second device connected to the second network; and
- a switch coupled between the first network and the second network;
- wherein the first device is configured to send an HTTP request according to the first protocol, the HTTP request includes a keyword, wherein the keyword indicates the format of information in the HTTP request; and

Art Unit: 2157

- wherein the switch is configured to reformat the HUP request to generate a second request according to a fiber channel protocol; and
wherein the switch is further configured to:
- parse the first request based on the keyword; and
- formulate the second request based on the format indicated by the keyword.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: the closet prior art of record (Scholl et al., U.S. Pat. No. 6,145,001) does not teach nor suggest a keyword that indicates the format of the first request and parsing the request based on the format to formulate a second request in combination with all the elements of the independent claims as argued by the Applicants'.
3. The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth.
4. Claims 30-39 are allowed.
